Exterior Portfolio® by Crane is more than beautiful, long lasting exterior products for your home. We believe in a sustainable future for everyone. For you, this means a home made from environmentally preferred materials. For us, it means cladding products offering benefits such as durability and low maintenance. All of our products provide a long service life that requires no harmful finishes. Because our commitment to the environment stretches from our home to yours, we engineer sustainable benefits into our product development process through innovations such as our SmartTrack™ moisture management system and our energy-saving, Solid CORE™ insulation. ARCHITECTURAL COLUMNS

# WELCOME TO A NEW STONE AGE

## PICTURE THE POTENTIAL

With BellaStone® Architectural Columns, homeowners have an option they may never have thought possible: the look of authentic, hand-carved stone.

Created with innovative technology, BellaStone columns deliver the feel of natural stone columns in a fraction of the time of masonry accents. Their affordability and ease of installation provides unprecedented opportunities to feature the look of stone in numerous exterior applications.

Make a statement at an entryway. Bring substance to fencing. Enhance a backyard oasis. Whether it's a new home, a new addition or a renovation, BellaStone columns add elegant style and undeniable curb appeal.

## DURABLE CONSTRUCTION

BellaStone columns feature construction and color that won't chip, crack or fade, so they're virtually maintenance-free.

### 50 YEAR LIMITED WARRANTY

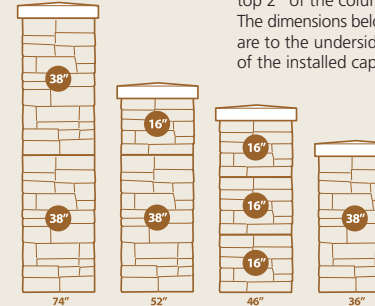

BellaStone Architectural Columns are engineered to provide lasting beauty. The columns are warranted against manufacturing defects for a period of 50 years from the date of purchase.

## ELEGANT STYLE

BellaStone columns feature all the detail, shadowing and texture of fine, quarried stone. They are available in intriguing gray Torino, deep, calm Tuscan and the rich mosaic of Bordeaux to give any home a powerful natural presence. Finish any look with a coordinated cap in Cobblestone or Keystone.

## UNPRECEDENTED VERSATILITY

Column modules are available in 20"x 20"x 16", 20"x 20"x 38", 14"x 14"x 16" or 14"x 14"x 38" dimensions. Use the modules individually or combine them in any configuration to create the column height and profile you desire. Here are just a few of the possibilities:

Note: When installed, the cap covers the top 2" of the column. The dimensions below are to the underside of the installed cap.

BellaStone columns install in a fraction of the time to build natural stone columns.

1

Secure a 4"x 4" wood post.

2

Slide the module(s) over the post (even the largest modules weigh only 25 lbs).

3

Secure to post and complete column with a coordinated cap. That's it!
