Durable

EDCO products are backed by six decades of experience in the design and manufacturing of high quality building products.

Our talented team of engineers have taken every measure to ensure EDCO steel siding withstands severe weather changes without unsightly panel distortion or breakage. EDCO steel siding is stronger and has more rigid panels than other similar products, ensuring tight seams and a straight, clean appearance.

Attractive

Everyone knows that painting exteriors can be costly and inconvenient. Our virtually maintenance-free products match your lifestyle. They won't chip, peel, rot, blister, or rust.

You'll never have to paint again! And our products provide a clean, distinctive look that vastly improves the appearance of your home or building.

EDCO steel siding is available in five distinctive styles and numerous designer colors for residential and commercial installations. Durable rigid steel panels with unique accessory trimmings offer a clean tailored appearance.

EDCO Steel Siding advantages:

- Attractive timeless designs
- Virtually maintenance free
- Excellent investment
- Clean, distinctive lines
- Made of strong galvanized Endura® Steel
- Durable PVC coating
- Woodgrain texture for extra strength and beauty
- Fifteen ageless colors with matching accessories
- Deeper color palate than vinyl
- Color coordinated matching Soffit, Fascia and Rainware
- Roll-formed accessories
- Won't chip, peel, rot, blister, or rust
- Optional extra insulation packages available
- Reduces energy costs
- Repetitive painting savings
- Industry-best fade protection warranty
- Lifetime Non-Prorated Limited Warranty
- Resists panel distortion
- Can be repainted if desired

FREQUENTLY ASKED QUESTIONS

Do I need to tear off my existing siding before residing?

No, you don't have to tear off your existing siding but you do need to make sure that the existing siding is in good condition and will hold nails. Have your contractor check your existing siding and make a recommendation during the bidding phase of the project.

How does the cost of steel siding compare to other siding?

Although steel siding may cost more initially it should save you money over the life of your home. Our steel siding is coated with a premium PVC coating that is very durable and is formulated to withstand the heat of the southern states and the cold of the northern climates. The baked on PVC finish means that you won't have to paint your home every 5-8 years.

Can I change the color of my siding if I want?

Yes, the baked on PVC coating that we use on our siding provides an excellent base on which to put a quality latex paint. This would allow you to refinish your siding to a different color of your choice.

Can my new steel siding be damaged by hail?

Yes, larger hailstones can dent your steel siding but it is much more resilient to damage than other sidings. Additionally, your steel siding is backed by a Lifetime limited warranty with a 50-year limited hail protection warranty.

Do I need to clean my steel siding?

In most residential areas normal rainfall is sufficient to keep the siding surfaces clean but we do recommend that the siding be washed annually or more often if conditions demand. Please refer to the back of the warranty for more information.

Do you offer more than one profile?

Yes, we have one of the largest selections in the industry. We manufacture an 8" clapboard siding, Double 4" clapboard siding, Double 5" Dutchlap siding, and a 12" Vertical siding.

Will my siding fade?

While any product may fade under certain conditions your new steel siding is covered by a Lifetime Non-Prorated Limited warranty that includes Fade Protection. The PVC coating that we use on our siding is one of the most advanced coating systems available today and has excellent color retention properties.

Do you have soffit and gutters that match my siding?

Yes, we have steel roofing, gutters, soffit and fascia in colors to match or compliment your steel siding. Ask your dealer for a color selector guide to see the colors and availability of these products. We also carry a complete line of shutters, louvers, vents and other decorative accent items.

What if I have a problem with my siding?

If you feel that you have a problem please contact our Customer Service department by mail, phone or electronically. The Customer Service department will then determine what caused the problem and then come up with a solution to the problem.

Will my siding still be available if we add-on to our home in a couple of years?

While we can't guarantee that all products will be available in the future we can tell you that since we started manufacturing steel siding that we have not discontinued a color or profile from our offering. We have been manufacturing steel siding continuously longer than any other manufacturer in the market place today.

Isn't steel siding 'old technology' compared to newer vinyl products?

Steel siding has been used far longer than vinyl products. That is because it is flat out, the best protective skin you can give your home. It can also be manufactured completely from American resources - unlike the crude oil required for vinyl products
