

**H**ave you considered the advantages of protecting your windows and doors with attractive aluminum awnings?

Whether they are over a door, window, patio or deck, awnings are a wise addition to your home. Window awnings prolong the life of your windows, while preventing fading of draperies, carpets and furniture from harmful UV rays. A canopy covered entrance will protect you and your guests from the elements while waiting for the door to open.

The color and character of awnings will add to the charm and elegance of your home.

**U.S. Department of Energy –  
Energy Efficiency and Renewable Energy**

Window awnings can reduce solar heat gain in the summer by up to 65% on south-facing windows and 77% on west-facing windows. You can use an awning to shade one window or have an awning custom-made to shade the entire side of your house. Awnings require ventilation to keep hot air from becoming trapped around the window.

Every awning is custom made to fit your windows and doors to exact specifications.

The shade afforded by Styleline awnings add to your air conditioner's efficiency, reducing your cooling costs, while louvered vents keep air fresher by allowing it to circulate.

Enjoy your leisure time. Styleline awnings are engineered to be virtually maintenance free for years.

**A**wnings and Canopies add beauty and charm to the exterior of your home. They allow people to enjoy outdoor activities, avoid excessive heat, sun exposure and rains by controlling the shading and light exposure on your deck, window, patio, terrace or balcony.

Aluminum awnings will never rust!

## Styleline Awnings & Canopies

Styleline awnings and canopies are constructed of the finest materials. With a baked on enamel finish, with white underside, Styleline awnings are built to last.

Panels are bonded together with aircraft rivets, not sheet metal screws, eliminating rattles and vibration noise.

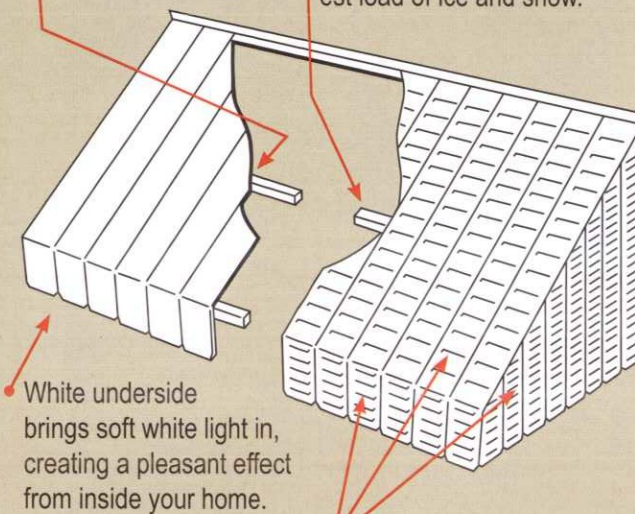

Aluminum awnings will never rust!

## HASTINGS by Styleline

Awning panels are securely fastened to the understructure from beneath. No exposed rivets or screws allow for a neat, clean appearance.

Strong understructure, solidly anchored, supports the heaviest load of ice and snow.

White underside brings soft white light in, creating a pleasant effect from inside your home.

Full air-flow louvers on the top, front and sides allow hot air to escape.
