FYPON
It's How You Finish.™

Synthetic Solutions For All Your Millwork & Trim Needs

Celebrating . . . Over 40 Years of Synthetic Millwork

In 1969 . . . Apollo 11 landed on the moon, Mickey Mantle retired from baseball and Richard Nixon became the 37th U.S. President. During that memorable year, something else happened . . . Fypon was born in Baltimore, Maryland.

Now, more than 40 years later, Fypon is the leading brand of urethane millwork and PVC Trim products. Fypon is focused on producing quality, low-maintenance products that will differentiate any home and save time and labor costs.* Fypon has also built a reputation for providing top-notch sales and customer service support . . . there to help you grow your business.

Today, Fypon is an even stronger company and is recognized as the brand name leader in the synthetic products industry.**

* Fypon® "Exterior Door Trim Kit Installation Comparison Study" was commissioned by Fypon in 2009 and conducted by Market Resource Associates, an independent market research company.

** *Builder Magazine* "2011 Brand Use Study".

In This Edition

This catalog is designed to provide easy-to-access details on more than 1,900 urethane and PVC trim products. It puts our most popular items at your fingertips, showcasing all of our products that ship within five days. With design tips and detailed photos throughout, it will also help homeowners visualize how Fypon® products can be used on their projects.

If you don't find exactly what you're looking for on these pages, remember that Fypon can custom create items to your specifications.

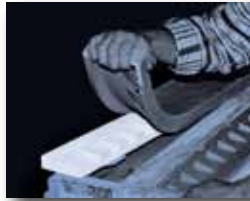

To view or download the most up-to-date version of this catalog, visit www.fypon.com, where you will find updates and an expanded product selection.

PVC and Polyurethane Solutions That Work For You

Fypon has the right stuff for virtually every millwork and trim project imaginable — from peak to plinth. Although we are known as the brand leader,* offering award-winning polyurethane millwork, we also carry a full line of high-quality PVC Trim.

With its superior performance, Fypon® Cellular PVC Trim is quickly becoming the preferred material for fabricators nationwide. Our free-foam manufacturing process results in a solid product that cuts smoothly without chipping, eliminates the need to seal or paint the cut edge and prevents mushrooming of the product when secured with screws.

Our decorative polyurethane products are made from detailed, finely crafted, original master production moulds. At Fypon, we consistently maintain our masters and moulds, replacing them if they show even the slightest signs of wear. This ensures that every custom design or classic trim accent is as clean and crisp as the first. Designed to save you time and money by reducing labor costs, Fypon® polyurethane products are out of the box and on the house with less effort than wood and competitive products.**

PVC and urethane complement each other and can be easily used together in nearly any project. Polyurethane and PVC are excellent alternatives to wood and many traditional materials in many applications. They won't split, chip or flake, there is consistent quality from piece to piece and many of our products have been specially designed to provide savings on installation labor. Backed by a lifetime limited warranty***, our products are beautiful and durable. All Fypon® products will look as good in 10 years as they do on the day they are installed.

So whether you're looking for polyurethane millwork or PVC products, our high-quality, low-maintenance pieces are perfect for builders, remodelers and homeowners who are eager to differentiate and add lasting beauty to their projects.

Fypon, it's how you finish.
